

FOR IMMEDIATE RELEASE
**BFX Equity Partners, LLC Announces Formation,
New ASME Fabrication Facility**

Dallas, TEXAS – BFX Equity Partners, LLC is pleased to announce the formation of BFX Fabrication, BFX Midstream and BFX Process.

Led by CEO and 35-year oil & gas veteran J.W. Varner, BFX Equity Partners was formed in 2007 as a Dallas-based team of industry-respected professionals and top tier experts in midstream, facility design, construction and operation as well as fabrication. BFX provides a single source for all oil and natural gas operations related to manufacturing, gathering, treating, processing, transportation and plant acquisition/refurbishing. Other corporate principals include Vice Presidents Steve Shotts, James Huddleston, Jim Wortham, Steve Chandler and Raymon Huddleston.

BFX Fabrication began live operation in November 2009 and manufactures ASME code vessels for gas processing and gathering companies, as well as noise abatement acoustical panels. The plant in Millsap, Texas sits on over 15 acres and includes a 10,000 square foot shop. “BFX Fabrication is landing contracts on the strength of our shop specs as well as our manufacturing expertise,” noted Shotts. “We have eave height of 35 feet, 25-foot hook height, and can manufacture final products up to 110 feet tall.”

BFX Midstream, headquartered in Dallas, is a seasoned team of design, construction and operations experts for projects that require moving gas or oil to market.

Also based in Dallas, BFX Process is a source for refurbished plants and all aspects of removal, installation and repair of processing and treating vessels.

The BFX Companies will be in attendance at the Gas Processors Association Convention in Austin, Texas on March 21-24.
